

Seahorse

I don't use my tail to swim;
I use my tail to hold on to seaweeds,
mangrove roots, and coral reefs.

Tuatara

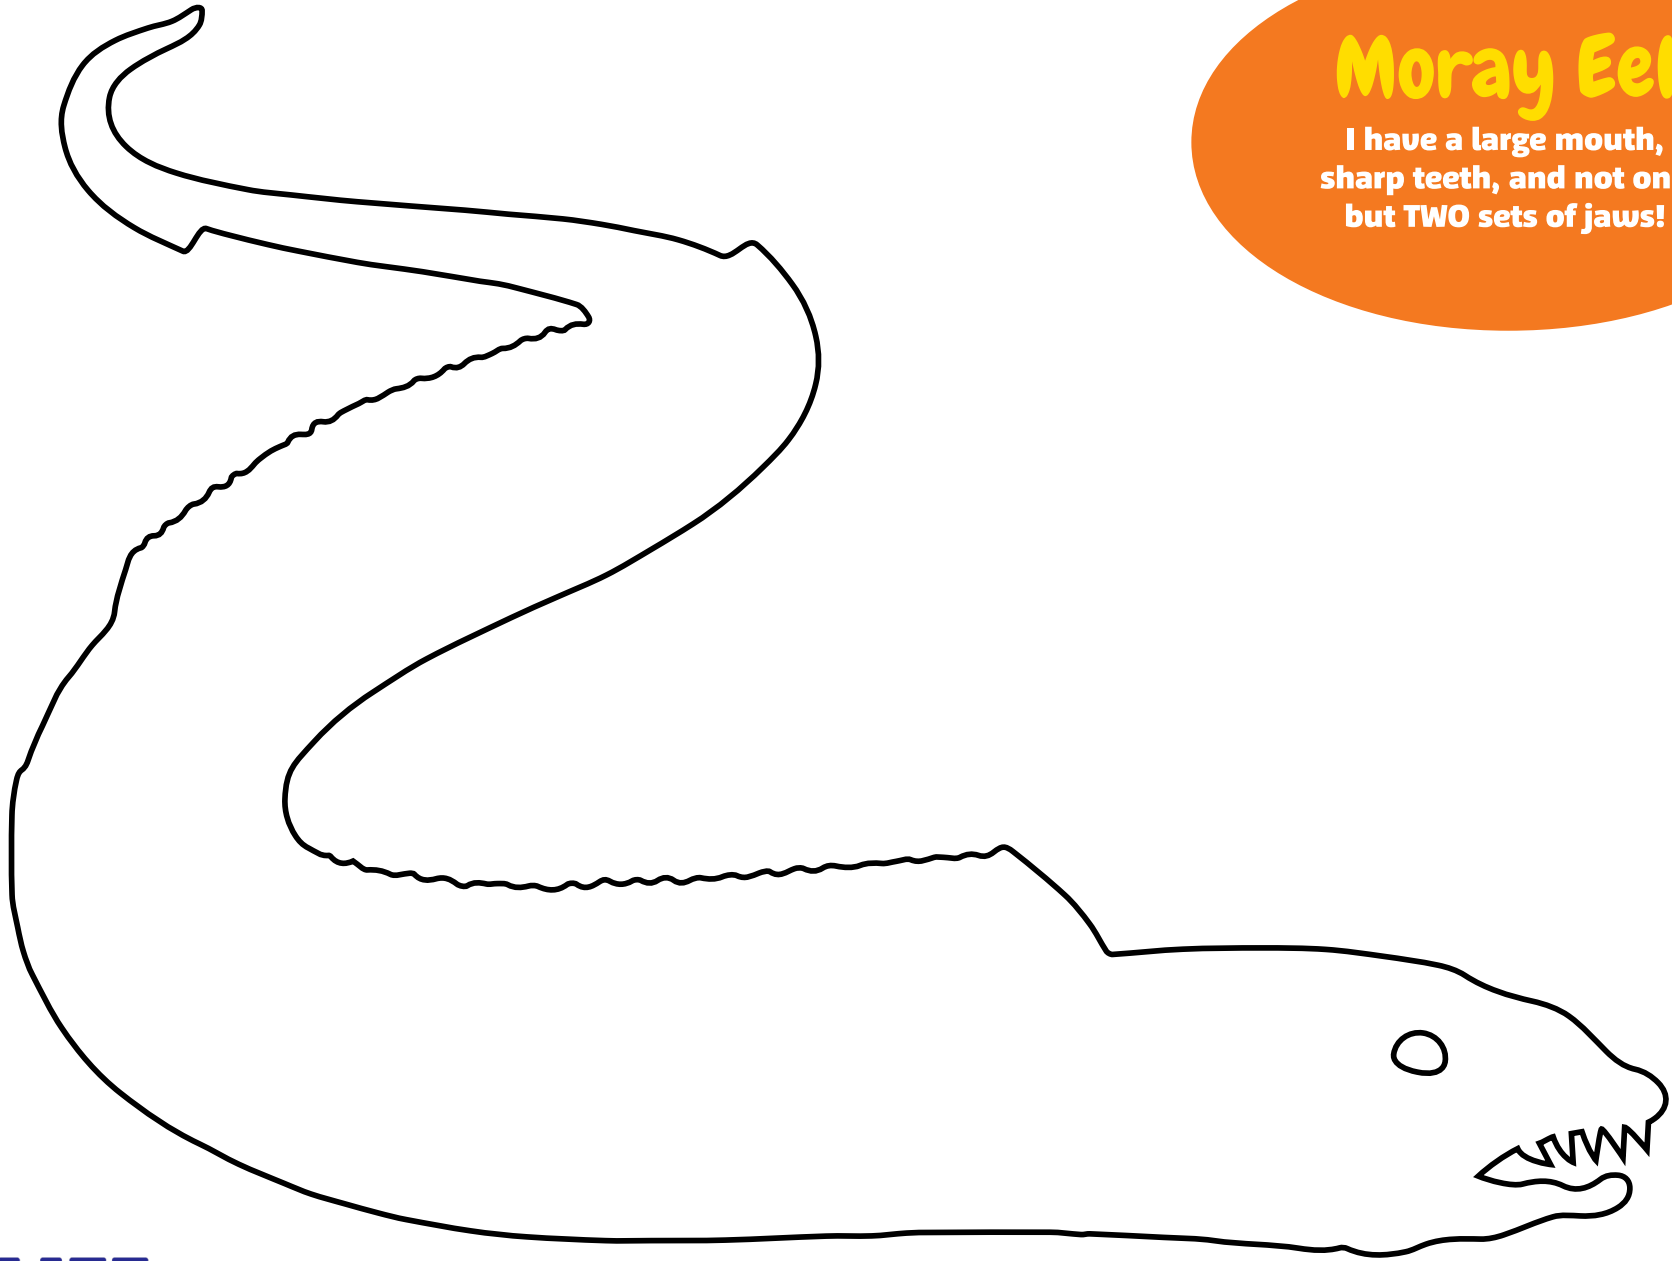

I have two rows of teeth on top and one row on the bottom. When I close my mouth, the bottom row fits in between the two on top.

Shark

I grow new teeth when I break them.
I go through up to 30,000 teeth in my
life time! That's A LOT of teeth!!

Moray Eel

I have a large mouth,
sharp teeth, and not one,
but TWO sets of jaws!
