

Limited Resources

What are four different limited resources that creatures could face in the aquarium?

Critical Thinking

How do you think SEA LIFE Aquarium reduces limited resources?

Biodiversity

Visit the Ocean Tunnel or the Ocean View Window (near dive station 7). Examine the tank closely and count how many different species of each creature you find. Then, record the results.

| Creature | Number of Species |
|-------------|-------------------|
| Sharks | |
| Stingrays | |
| Sea Turtles | |
| Fish | |

Critical Thinking

Why is it important to have many different species in a habitat?

Build a food chain

Using species found in the aquarium, create a food chain. Include at least 4 different species and be sure to label the producers, consumers and decomposers.

Now, build a food web

Use your food chain above and add creatures to create a food web. Include at least 10 species and label the producers, consumers and decomposers.
