

Watch the Sea Urchin video and analyse how this organism survives in a rockpool environment.

1. Identify and describe structural adaptations of the sea urchin.

---

---

---

2. Explain how these adaptations support survival.

---

---

---

3. Describe what the sea urchin does in its environment, based on the video.

---

---

---

4. Using what you have learned, predict what could happen if sea urchin populations increased or decreased.
