

Watch the Sea Star video and analyse how this organism survives in a rockpool environment.

1. Identify and describe key features of a sea star.

---

---

---

2. Explain how these features help the sea star survive.

---

---

---

3. Describe any environmental conditions shown in the video that the sea star must survive in.

---

---

---

4. How does the sea star feed in a rockpool environment?

---

---

---

5. How does it protect itself from predators?

---

---

---

6. How do its features help it survive in its environment?

---

---

---

7. What might happen to the rockpool ecosystem if sea stars were removed? Explain your reasoning.

---

---

---
