

LOCKDOWN CHALLENGE

MAKE A BIRDS NEST

A **bird nest** is a safe space that birds build to lay their eggs in. It helps to keep the eggs before they hatch.

Inspired by the **Australian Birds** we have here at **WILD LIFE Sydney Zoo**, we challenge you to make your very own birds nest from materials around your home! (Recycled materials are best!)

Top tips

- ▶ **Do some nest research!**
Have a look online, in books and out your window. What does a birds nest look like?
- ▶ **Look for materials** around your house or collect items from outside that look like they would be able to support an egg
- ▶ Your nest needs to be able to **hold and protect an egg** safely. Try using an egg or pebble you have at home to build the nest around
- ▶ **Get creative!** Use different **recycled materials** from around your home to make it your own!

Did you know

there are all different shaped nests? Some are cup nests, some holes in the ground and others are piles of twigs & leaves!
