

The future workforce of SEA LIFE

There are a number of different job roles that are fundamental to making the day to day running of a SEA LIFE aquarium possible.

We have presented you with job descriptions for **four** of the roles within the team.

Choosing **two of the roles** that interest you the most...

- Identify 3 areas of specialist knowledge important to that role, and why this knowledge is vital in their role
- Identify 3 skills or attributes for the role, and why you believe these to be so important to that job

Job role:	Job role:
3 areas of specialist knowledge most important to that role, and why it is vital 1. 2. 3.	3 areas of specialist knowledge most important to that role, and why it is vital 1. 2. 3.

Extension/Challenge activity

Across these roles, there are some common skills used that are important for working at a SEA LIFE aquarium. These are identified in the table below.

For each, score yourself between 0-5 based on how much you **currently use this skill in your life**, score between 0-5 on how important you believe it is in the **workplace (for your future)**, and write **why** it may be important to demonstrate this skill to a potential employer.

Skill	How often do I use this skill in my current life? Score 0-5	How important might this skill be for me to demonstrate in the workplace in my future? Score 0-5	Why is this skill important?
