

## Meet our Epaulette Sharks

Watch our Epaulette Sharks Fun Fact YouTube video

<https://www.youtube.com/watch?v=nopEcJNzoYM>. Use the video and your own knowledge to answer the following questions.

**What were our epaulette sharks doing when you spotted them in the video?**

eating

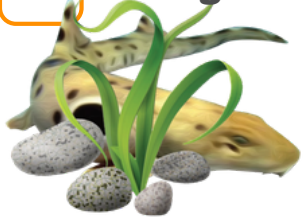

crawling

swimming

hiding

Identify and describe at least two adaptations of the Epaulette shark.

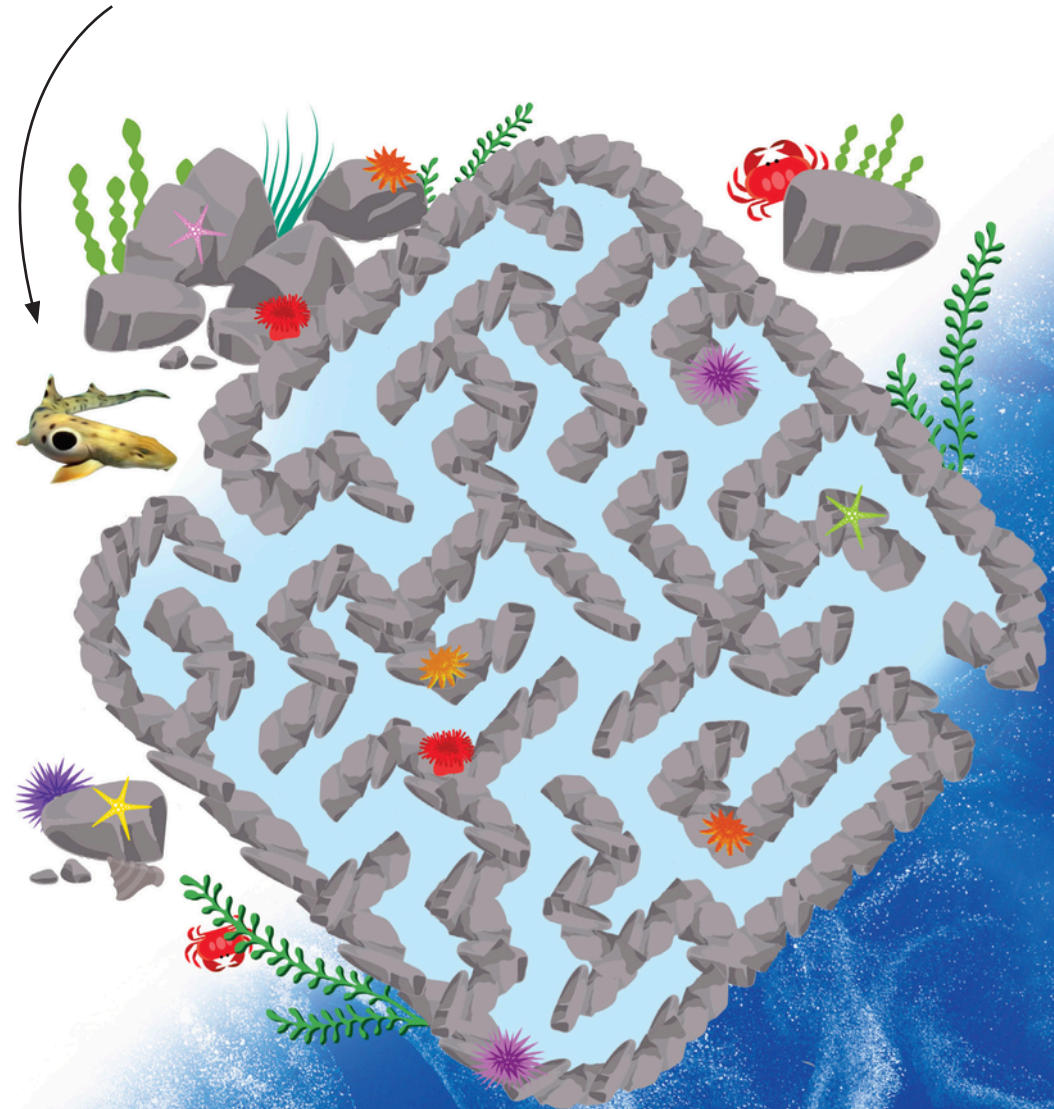

---

---

---

---

**Help the epaulette shark navigate the rocky tide pools and make it out to the ocean!**

Now that you've identified at least two adaptations of the epaulette shark,

1. Explain how each adaptation helps the shark survive.
2. Describe the environmental challenges the shark faces, based on what you observe in the video.

Explain:

1. How does the Epaulette shark move between rockpools?
2. Why is this adaptation important in a changing environment?
3. What might happen if the shark could not move between rockpools?

Compare the Epaulette shark to another rockpool organism. Explain how their adaptations are different and which animal is better suited to survive extreme conditions.
